Open Brief / Open Letter

to
Iran + Kremlin
NRG = Nuclear medical products in NL

= new business-deal for medical treatments

Nuclear research & consultancy group,

NRG, its about time that you comprehend the hard reality about live in NL
– and the warmakers-mentality of Balkenende & co-.

You are now on a website that proves that there is a lawcase against the Dutch supreme court,
Balkenende & muncipal Bloemendaal with the International Criminal Court, since 1 may 2007.
Evidence on www.desireestokkel.nl

On Presidents' Office you read that many Presidents & Parliaments recognize this lawcase.

- Iran is one of them.
- Iran is being boycotted by NL-parliament or the fact that they do recognize my ICC-case, not for the danger they cause on the Nuclear-field.

**I want you to contact the Kremlin & Parliament of Iran for a new business-deal with NRG
- between the 3 countries -... for medical isotopes ... for medical treatments....**

The Canadian-powerstation is flat; there's NO 'safety at work' anymore overthere.

**Nuclear-station Petten in NL needs to be closed for 6 months, for maintance.
Earth can not survive without medical isotopes**

Why?

- **NRG can take away war from the Middle-East.**
- **Its a firm reality-check for Europe.**
- **Its a good inspiration for other countries.**

Iran & Kremlin,

You know what I want of you, I am not going to repeat it.

Have all days in my EQ,

desiree stokkel,
