Agriculture & Farming politics

27 aug 2008

Vladimir Putin & NL-tuinders,

Weekblad Groente & fruit in NL

Putin, you need my famous brain to survive 'Wars for Food'.
Or rather...to anticipate on it....

We are running OUT of time; just do as I tell you.
'I need you to make a new law for Russia, which can be copied by NL-agriculture'.

First a Dutch example:

- Cucumbers-farmers get payed about 18 euro-cent for 1 cucumber.
- Costprice is 28 cent, at the least.
- Supermarkets cause bankruptcy, malnutrition or death of 'simple people'; they don't want to pay the costprice. In the shop I have to pay between 80 - 140 cents for 1 cucumber.

I want you to make an Russian-law that obliges retailers to publish their every 3 months on the Web:

- Purchase-price. What do they pay for 1 cucumber or other food-related article?
- Costprice retailing. How much are the overhead-costs?

In NL you have to talk to farmers, Wageningen-university, Delft-university and even Rabobank.
You may not go to Nijenrode-university = bla-bla-culture, no agriculture

Have a straightforward day, anchored in my EQ,
